Todos, Todos

Todos

- ☑ Style with Flexbox
- ☑ Master your HTML
- ☑ Practice Array Extras

Developer started this work but left in the middle, we need help adding the following features:

- Add the following properties to the todo:
  - createdAt = (timestamp)
  - importance = (number: 1-3)
    (use another input)
- Add validation that the todo text is not empty before creating the todo
- Support sorting the todos by: txt / created / importance use a dropdown <select>

- When there are no todos to display show:
No todos / No Active Todos, No Done Todos
- When delete is clicked, use confirm() and only if user approves – delete the todo

Bonus (after you're done with all work)
- BONUS: **Only when todos are NOT filtered** – show 2 more buttons:
Up Arrow, Down Arrow to change the order
  - For The first / last todo the up/down should be disabled accordingly
- BONUS: Remove the dropdown filter, and make it look like this:

3 items left | All | Active   Completed
